

## Oral Health CHW Job Description

Through education and preventive services **Ready, Set, Smile** prepares and empowers all children in our community to care for their oral health and gives them the opportunity to be free of dental disease.

We're looking for an energetic, passionate and dedicated person to connect with children, families and schools in our community to empower them to care for their oral health through learning and doing. Too many children have poor oral health that affects their ability to learn and develop in optimal ways. You can be the difference!

As the CHW who joins our team, you will learn from us how to teach children about oral health, develop relationships with families, and nurture partnerships with schools. You will learn how to plan and prepare for clinics, how to assist dental providers with charting, how to help our patients feel comfortable and cared for, and how to safely manage the information we collect.

We go where the children and families are in their schools. We ask that you have a driver's license and transportation to get to our schools and early childhood learning centers. We pay mileage costs.

We work closely with students and families, so for your safety and theirs, we require that you are fully vaccinated for Covid-19 and other required vaccinations by your start date. If you don't already have them, we will help you find a place to get them.

If you love children and want them to have the opportunity for better health and a better life, then join our team at Ready, Set, Smile.

For any questions, please call Ann Copeland at 612-721-6118

Wage is commensurate with experience. Benefits provided.
